## IT-SKILLS

- System Administration
- Hardware Networking
- Penetration Testing
- Systems Installation
- Technical Support
- Troubleshooting
- Configuration & Upgrading
- IT Service Management
- Programming/Web-Development

## PROJECT DETAILS

### Etracker

Offline Tool to track Employee Activity & assess their performance based on Login Hours and attendance. ( Designed & Developed using VB v.6)

### DataLocker

Another offline tool, aimed to protect data and critical client information. It records individual activity & create logs in database. It saves their troubleshooting logs & reminder for further references and use.( Developed & Designed using VB v.6)

### Knowledge - Base

Offline Web portal for quick & proper resolution of technical issues faced by technical team while troubleshooting, linked to other valuable sources for complex issues & updates.  
(Designed & Developed using HTML5, CSS, Javascript)

### QLinux

For now, this Python script(QLinux.py) is like a “Windows Quick Launch” for newbie on Linux (Basically, Kali Linux). The purpose of writing this script is to overcome the hurdle and ease the use of most advanced and powerful Open-Source/Free Operating Linux as I felt like lost in ocean when started using Linux for the first time. (<https://github.com/itsmanu4u/QLinux>)

### ITforAll

Blogging Platform for various technologies(i.e Java, .Net, PHP, Django, Python, WordPress, Android, Kotlin, etc). Design, Developed and maintained by myself.  
(<https://itsmanu4u.github.io/itforall/>) (Designed & Developed using HTML5, CSS, Javascript)
